ABOUT US

Who Are We?

Istinye University was established by the 21st Century Anatolian Foundation in 2015, as a continuation of 25-year experience and saving of MLP Care group which has brought together 3 different hospital brands: Liv Hospital, Medical Park and VM Medical Park.

The main goal of Istinye University is to educate new generations who can maintain their own individual improvements and take responsibilities for sustainable developments of society.

Istinye University, which applies the student-oriented education approach in all processes of the university, aims to expand the boundaries of science, to apply the findings of scientific developments for the welfare of the society, and to provide accessible health services to the society in line with its vision of becoming a science and research center.

In this context, we are giving shape to the future by being a pioneer in education, teaching and research through our academic, scientific and cultural activities.

ISTINYE UNIVERSITY HOSPITALS

Fully Equipped Health Base

"Learning through experience is the philosophy of Istinye."

Istinye University has two research hospitals, Medical Park Gaziosmanpaşa and Liv Hospital Bahçeşehir.

Students are able to gain experience in our hospitals with the academic approach of Istinye University and the perfect service manner of our hospitals.

Istinye University Liv Hospital Bahçeşehir provides tertiary health services including education and research studies while accepting patients in all branches like Organ Transplantation Center, Vascular Health Center, Spine Health Center, Pain Center, Stroke Center, Speech and Language Therapy Polyclinic, Sleep Disorders Center, Psycho-Diet Polyclinic, Hair Transplantation Center, Medical Aesthetics Department, Medical Oncology. It also brings together multidisciplinary branches such as Oncological Surgeries, Obesity Surgery, Hand Surgery, IVF Center, Palliative Care Center, interventional radiology and advanced interventional radiology under one roof.

Istinye University Hospital Medical Park Gaziosmanpaşa, serving with its dynamic and teambased system, advanced technology and scientific understanding; operates with a multidisciplinary working principle. It provides world-class service in all branches; the most up-to-date medical and surgical methods are used in the diagnosis and treatment of chronic diseases such as diabetes, obesity, hypertension, heart diseases, and cancer diseases, which are considered to be diseases of our time, with modern technologies.

CAMPUSES

Istinye has 2 campuses that are located at the heart of İstanbul. It provides its students an educational environment closely intertwined with the social and cultural texture of the city.

Students can spend their days both learning and feeling the college atmosphere. Istinye has everything that a student needs to be a part of a social environment, from restaurants to gym.

TOPKAPI CAMPUS

- Fully Equipped Classrooms
- High Technology Medical Labs
- Computer Workshops
- R&D Centers
- Conference Rooms
- Multipurposed Rooms
- Library
- Student Center
- Congress Center
- Gym

LOCATION AND TRANSPORTATION

"İstanbul is at the heart of the world, Istinye University is at the heart of İstanbul!"

Divided by the Bosphorus and built on two continents, Asia and Europe; İstanbul is a metropolis, which is the intersection point of different civilizations. Thanks to its rich historical and cultural heritage dating back to Byzantium, there are many historical places to explore in İstanbul.

Declared as the European Capital of Culture in 2010, İstanbul is a city that hosts many important cultural and sporting events, concerts and festivals as well as its natural beauty. İstanbul atmosphere encourages students to adopt a very active lifestyle.

VADİ CAMPUS

- Spacious Classrooms
- Labs Enriched with Latest Technology
- Library
- Engineering Labs
- R&D Centers
- Architecture Workshops
- Social Environment

Istinye University gives its students the opportunity to spend their university years in this dynamic metropolis and live the most unforgettable moments of their lives in this dynamic city.

Located in the city center, both campuses of Istinye are very close to public transportation such as subway, metrobus, Marmaray and tram line.

We also have free transportation between public transportation areas and our campuses and between our two campuses.

STUDENT LIFE OUTSIDE OF LECTURES

Creating a campus life brimming with social activity through more than 50 student clubs, from theatre to Photography, Istinye gives students the opportunity to be versatile.

It is designed for students to have an academic environment enhanced with fitness centers, libraries and study halls and private rooms for studying.

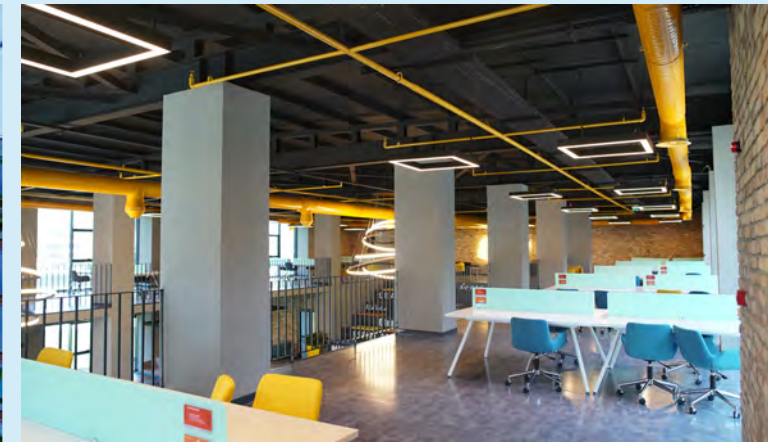

Istinye offers a wide green area for students to relax and spend time in the middle of the city.

The students will socialize in the Student Center and they will find themselves in the campus life in the middle of the city thanks to the large study areas and spacious green areas.

ISU Student Center provides students a colorful university life through a variety of events while preparing them for their future careers with services like career consultancy, traineeship opportunities, psychological support etc.

Istinye University hosts hundreds of events throughout the year and offers students a social learning-oriented environment.

RESEARCH AND ACADEMIC

New Generation R&D Centers

Designed by experienced researchers and equipped with high technology, Research and Development (R&D) Centers of Istinye University contribute to public and academic studies in all fields.

Laboratories and Workshops

We believe that practical experience is as important as theoretical experience.

Learning through experience is supported by laboratories and workshops that are equipped with the latest technology.

Both our campuses have the labs for our students to conduct their research and study while experiencing and several workshops to have on-the-job training.

Silent, peaceful study rooms

Easy access to computers

Central Library that is open for 24 hour

Language Opportunities

Learning new languages is like a key opening different gates and worlds. With this motivation, foreign language education is given utmost importance by Istinye.

We are offering two different preparatory programs, English Preparatory Program for English-Medium department students and Turkish Preparatory Program for Turkish-Medium department students.

Modern Languages Division of the Foreign Languages Department provide our students the opportunity to learn a second or a third foreign language besides English.

A diverse range of language courses that can take students from beginner through to the advanced level are offered and many of our courses are taught by native speakers.

Our aim is to enable students to actively use a foreign language, providing an excellent preparation for work, study or travel abroad. Learning a language offers students not only the possibility to increase their knowledge of other cultures and broaden their horizons, but it will also enhance their employability and enable them to build confidence to study or to do an international placement abroad.

Languages we offer include Arabic, Chinese (Mandarin), French, German, Italian, Russian, Spanish and Turkish as foreign language.

On the other hand, our ISU TURKMER program is for students who want to learn Turkish to meet the language criteria of their departments or to improve their language skills.

Academic Staff

Our experienced academic staff who generates international and scientific values in their own fields and contributes to global science, prepares our students for the future.

As the backbone of Istinye University, our expert academic staff leads our students on their academic journey throughout their years spent in our university.

Faculty of Medicine

Schools

3

Institutes

Founded on the strength of 25 years of knowledge and experience of the MLPCare Group, one of the leading health institutions in Turkey and in the world, Istinye University offers its students all amenities of modern education with its 9 Faculties, 2 Vocational Schools and 3 Institutes.

Istinye University Faculty of Medicine, which started its educational and research journey with its first students in the 2016-2017 academic year, took its deserved place among the most prestigious and preferred medical faculties in our country and our city with its distinguished academic staff, qualified education program, education and research laboratories at international standards.

With its R&D Labs, extensive network of hospitals and an academic program with an enriched clinical experience, our Faculty of Medicine trains physicians who are committed to a scientific approach; advocate for universal facts; and who shall contribute to scientific advancements.

Faculty of Pharmacy

Pharmacy (Turkish and English-Medium)

Providing its students with research experience from day one through laboratory facilities, our Faculty of Pharmacy trains pharmacists who play an active role in the development of a product that can potentially be manufactured as a drug; and who will support Turkey in becoming a leader in the pharmaceutical industry.

Faculty of Dentistry

Dentistry (English-Medium)

Faculty of Dentistry which started its educational activities in the 2021-2022 academic year; aims to create a student-centered dentistry faculty that combines scientific-based, evidencebased and qualified dentistry education with research culture and technology and where there is a strong communication between the academics and the students.

It also aims to train leading dentists who can think critically and creatively, adopt a scientific perspective, respect humanity and ethical rules and add value to their profession by carrying out scientific research that contributes to the progress of humanity and produces universal knowledge.

Faculty of Engineering and Natural Sciences

Computer Engineering (English-Medium)
Electrical and Electronics Engineering (English-Medium)
Industrial and Systems Engineering (English-Medium)
Civil Engineering (English-Medium)
Mechanical Engineering (English-Medium)
Software Engineering (Turkish and English Medium)
Biomedical Engineering (English-Medium)
Bioinformatics and Genetics (English-Medium)
Molecular Biology and Genetics (English-Medium)
Mathematics (English-Medium)
Chemistry (English-Medium)

Our Faculty of Engineering and Natural Sciences which includes 12 departments that work in cooperation drives the changes in the world of technology, trains creative engineers who are the pioneers of new technics, methodologies and ideas to be generated.

Faculty of Economics and Administrative Sciences

Economics (English-Medium)
Business Administration (English-Medium)
International Trade and Business (English-Medium)
Health Management (Turkish-Medium)
Management Information Systems
(Turkish and English-Medium)
Political Science and Public Administration
(Turkish-Medium)
International Relations (English-Medium)

Our Faculty of Economics and Administrative Sciences which is supported by an advanced technology in cooperation with the industry and offers a people-oriented academic program based on values of justice, trains individuals with developed analytical thinking skills who are open to innovative approaches, and who can provide solutions for problems related to the society and the environment.

Faculty of Communication

Public Relations and Advertising (Turkish-Medium)
Radio, Television and Cinema (English-Medium)
New Media and Communication (English-Medium)
Visual Communication Design (Turkish-Medium)

Istinye University Faculty of Communication plans its entire educational structure to be instrumental in the advancement, development and specialization of its students in two main areas. The first of these is to prepare the students who specialize in the relevant academic field with sufficient knowledge and experience in the field and prepare them for graduate education, and to prepare the ground for the student to step into academic competence in line with its purpose and in the continuation of the process. The other is to train qualified and well-equipped professionals in sectoral fields that provide transition, inclusiveness and sustainability on the basis of the department in which the students are educated.

Faculty of Humanities and Social Sciences

English Language and Literature (English-Medium)
Psychology (Turkish and English-Medium)
Sociology (English-Medium)
Turkish Language and Literature (Turkish-Medium)
Interpretation and Translation (English-Medium)
Philosophy (Turkish-Medium)

With the academic programs where theoretical knowledge is reinforced by practical and laboratory courses, our Faculty of Humanities and Social Sciences trains individuals who will lead the society by upgrading their skills and knowledge in the face of change.

Faculty of Fine Arts, Design and Architecture

Interior Architecture and Environmental Design (Turkish-Medium)

Architecture (Turkish and English-Medium)

Gastronomy and Culinary Arts (Turkish and English-Medium)

Digital Game Design (English-Medium)

Set up with studios in line with the goal of developing practical skills based on creative thinking, our Faculty of Fine Arts, Design and Architecture prepares the students for their careers ahead.

Faculty of Health Sciences

Nutrition and Dietetics (Turkish-Medium)

Child Development (Turkish-Medium)

Speech and Language Therapy (Turkish-Medium)

Midwifery (Turkish-Medium)

Physiotherapy and Rehabilitation (Turkish and English Medium)

Nursing (Turkish and English Medium)

Social Work (Turkish-Medium)

Audiology (Turkish-Medium)

Leaning on the know-how and experience of many years of the MLPCare Group which is one of the largest health brands of Turkey and the world, our Faculty of Health Sciences trains healthcare professionals who will make a difference with their professional skills and capabilities in the field of health.

Institute of Health Sciences

(Turkish-Medium)

Institute of Science

(Turkish and English-Medium)

Institute of Social Sciences

(Turkish-Medium)

Architectural Design (with thesis) (Turkish)
Computer Engineering (with/non thesis) (English)

The Institute which has made it its mission to contribute to İstinye University, which has "Research and Development" at the forefront of its strategic priorities, aims to accelerate its graduate activities with the new master's programs planned.

INTERNATIONALIZATION

Istinye University believes that the main condition for modernization in any institution is internationalization.

In this context full-time international student recruitment, application and admission processes of international students, international promotion activities, Erasmus + Student and Staff Mobility, bilateral exchange programs within academic cooperation, and process of international cooperation protocols are carried out by our university.

In this way, our recognition in the international arena is increasing and collective notion of knowledge expands by sharing the worlds. We have over 80 bilateral Erasmus+ bilateral agreements signed with over 75 universities from 18 different countries and general academic cooperation protocols with over 50 universities from over 26 different countries with the aim of increasing our international visibility and carrying out innovative works by combining different visions.

In addition; we are a partner of one of the biggest Medical Consortium with Trakya Univesity, Düzce University, Ankara University, Hacettepe University and Sakarya University, leading universities in Medicine field and a partner of Social Sciences Consortium with Atılım University, Aydın University, Bahçeşehir University, Başkent University, İzmir Economy University, Marmara University, Turkish-German University, and Yeni Yüzyıl University.

Erasmus+

"Go on your best trip with Erasmus!"

The students can study or have their internships in European Countries, at any distinguished institution that we are partnered with. We believe that Erasmus program is a great opportunity to experience the world abroad and develop language skills. We are not only sending our students and staff to European countries to gain experience and learn from other cultures; but also hosting students and staff from all over the Europe within the scope of the mobilities.

International Students

Istinye University, which has over 2000 international students from over 90 different countries expands its international student family day by day and gradually becomes a center of international education in Turkey.

Our International Relations Directorate conducts all the procedures of the international students; from their enrollment in departments to getting a residence permit.

With our inclusive approach, students are able to adapt to the environment easily and become a part of the new world they are experiencing.
